**The Natal Chart
or any Astrology
Chart Shows
where the
planets are in
relationship to a
location and a
time of day.**

**New Moon
Jan 1, 2014
4:14 am
Tucson, AZ**

In this Chart Venus is Retrograde and an Evening Star

The planets are Rising and setting Clockwise.

The purple line represents the horizon line as seen from Earth.

The left side of the chart is East and the Right is West.

We will see how the Sun and Venus on the chart can quickly tell us if Venus is rising before or after the Sun.

Simplest Way to Know if Venus is Morning or Evening Star

No Matter Where the Sun is on the Chart
turn the chart toward your Belly (or as shown here)
and notice if Venus Is to the left or right of the Sun

Venus to the left of the Sun Is
Morning Star Rising before the Sun

Venus to the Right of the Sun
Evening Star Appearing After the Sun

Morning or Evening Star Venus

Remember planets rise and set clockwise.

On the left Venus sets before the Sun as Morning Star
and on the right Venus Sets after the Sun as Evening Star

**Venus ahead of the Sun Is
Morning Star Rising before the Sun**

**Venus Behind the Sun
Is Evening Star Appearing after Sunset**

Morning or Evening Star Venus

Keep in mind how the planets rise and set clockwise.
On the left Venus rises before the Sun as Morning Star and
on the right Sets after the Sun as Evening Star

**Venus ahead of the Sun Is
Morning Star Rising before the Sun**

**Venus Behind the Sun
Is Evening Star Appearing at Sunset**

**When Venus is
Within 10
Degrees of the
Sun and NOT
retrograde it is
the Inanna
Underworld
Phase**

When Venus is within 10 Degrees of the Sun and retrograde it is the Metamorphic Underworld.
