

Mercury Maximum Elongation – Find Out for Yourself

1. First, determine whether you have a Morning Star Mercury, an Underworld Mercury or an Evening Star Mercury
2. On your astrology chart, count the number of degrees from your Mercury to your natal Sun
3. Once you have that result, go here:
<http://www.fourmilab.ch/images/3planets/elongation.html> This website will let you type in the year of your birth to find the closest Mercury Elongation (maximum distance from the Sun) to your birthday
4. The Maximum Elongation can be anywhere from about 18° to about 28° in the AM or PM skies
