

The Mercury Return Cycle

- This Cycle is based upon Mercury's Return at or near it's original position when a person was born
- The Return Cycle is calculated as a synodic cycle – Mercury Station Direct to Mercury Station Direct – about 120 days on average
- The Ages for the Most Exact Mercury Return are as follows: 7, 13, 26, 33, 39, 46, 79 and 92
- Minor Returns take place at Ages: 20, 40, 52, 60, 65, 78 and 80
- The Mercury Return is about the next octave of the original intent of the Emerging Mind in its natal sign
